

AI Networks Are Moving Faster. So Is the Interconnect.

Technical Fact:

Modern AI fabrics are rapidly moving from 400G to 800G and toward 1.6T as GPU clusters demand dramatically more east-west bandwidth.

What Axiom and Connection Can Deliver:

- 400G, 800G and 1.6T optical connectivity
- OSFP and QSFP-DD transceivers
- DAC, AOC and high-speed copper interconnects
- Network adapters and GPU-fabric connectivity
- Solutions engineered for leading OEM networking platforms

We're Your Advanced Technology Partners:

Axiom gives you an OEM-alternative path for the high-speed connectivity surrounding today's GPU infrastructure. Not just traditional enterprise networking.

1.6T = 1,600 gigabits per second through a single optical interface.
